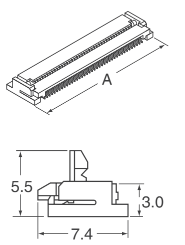
FH16, FH16H, FH16M and FH16P Series (0.3mm/0.4mm/0.5mm Pitch)

Dim. in mm.



Features: The FH16 Series is a fine pitch, Zero Insertion Force (ZIF), right angle, bottom contact connector compatible with Flat Flex Cables (FFC) or flexible printed circuits (FPC) with a pitch of 0.3mm, 0.4mm and 0.5mm. A recommended thickness of 0.295mm for single-sided or 0.306mm for double-sided. The flip-lock (one-touch rotating type) ZIF structure secures the FFC/FPC connection with a single and light force. This design helps simplify assembly and repair work. When locking the FFC/FPC, the audible click assures the assembly worker of a steady FFC/FPC connection resulting in improved customer service. Embossed tape packaging allows for automatic placement onto the PCB.
Applications: • Notebook computers, printers, PDAs, digital cameras and other compact devices for interconnecting the main circuit board with the LCD, PDP (Plasma Display), HDD or other device
Specifications: • Operating Temperature: -40°C ~ 70°C • Insulation Resistance: 500MΩ minimum • Contact Resistance: 150mΩ maximum (including FFC/FPC conductor resistance)
Materials: • Insulators: Polyamide and LCP - Beige, PPS - Deep Brown; UL94V-0 • Contacts: Phosphor Bronze - Solder plating

FH12, FH12A, FH12F and FH12S Series — "Flip-Lock" SMT/ZIF Type Flexible Printed Circuit Board Connectors

The FH12 Series of miniature connectors for FPC/FFC use brings form to the newly developed "flip-lock" concept and can be used with Surface Mount Technology (SMT) to eliminate the problems of the contemporary slide-lock system. These connectors have a contact spacing of 0.5mm, are suited to high density mounting, and are based on a single-action Zero Insertion Force (ZIF) structure for easy connections. Types with top or bottom contacts, and vertical mounting are available to suit your applications.

Materials/Finish: • **Insulation**: Polyamide Resin, beige; PPS Resin, dark brown (UL94V-0) • **Contacts**: Phosphor Bronze, solder plating

Electrical: • **Rated Current**: 0.4A • **Insulation Resistance**: 500MΩ or greater at 100VDC • **Withstanding Voltage**: 150VAC for one minute • **Contact Resistance**: 50mΩ or less *(**Note:** When all conductors are to continuously carry the rated current, set the current to 70% of the rated current value.)*

1mm Flex Connectors

1mm Pitch Flexible Printed Circuit Connectors (Figures 1 and 2)

FEATURES: • High-density packaging achieved by 1mm pitch contacts • Dual-side contact construction allows FPC and FFC conductors to be inserted in either direction • Enhanced contact reliability through high contact pressure • Applicable to 0.25mm to 0.35mm thick flexible printed circuit boards • Uses PBT (UL94V-0) insulating materials which are highly resistant to solvents and high temperature • Kinked dip posts for board retention during wave soldering **MATERIAL/FINISH:** • **Insulator:** Polybutylene Phthalate, black • **Contacts:** Phosphor Bronze, tin-lead plated **Electrical:** • **Rated Current:** 0.5A • **Insulation Resistance:** At 100VDC, 500MΩ minimum • **Withstanding Voltage:** 150VAC for 1 minute • **Contact Resistance:** 40mΩ maximum

SMT ZIF Type Flexible PCB Connectors (Figures 3 and 4)

FEATURES: • Low profile type with 3mm packaged height; 1mm pitch permits high-density packaging • Excellent workability is offered by the ZIF structure which provides positive contact by only lightly inserting FPC/FFC and then pushing in the movable locking flap • Recommended thickness of flexible circuit board is 0.25mm to 0.30mm • PPS (UL94V-0) with excellent solvent resistance and high temperature resistance is used for the insulation material • The SMT type connectors permit high density and automatic packaging on circuit boards **MATERIAL/FINISH:** • **Insulator:** PPS Resin, natural finish • **Contacts:** Phosphor Bronze, tin plating **Electrical:** • **Rated Current:** 0.5A • **Insulator Resistance:** 500MΩ at 100VDC minimum • **Withstanding Voltage:** 150VAC for 1 minute at specified value • **Contact Resistance:** 25mΩ maximum

0.30 mm (0.012”) FFC-FPC Connectors

SFYL and SFYL-U Series

The SFYL and SFYL-U Series are a 0.30 mm (0.012 in) pitch cable to board connector with an ultra low profile. The series adopts the Surface Mount Technology (SMT) and Zero Insertion Force (ZIF) or Low Insertion Force (LIF) mechanism which enable easier cable insertion. These are suitable for high density design of consumer equipment, especially CD-ROM Drive, Digital Still Camera (DSC), Digital Video Camera (DVC) and Mobile Phone.

Features: • Ultra low profile design provides a body height of 1.2 mm (0.047 in.) • Easy handling cable insertion by actuator driven • High cable retention force • Design against solder and flux wicking

Materials:
• **Housing/Actuator:** Glass reinforced high temperature thermoplastic (UL94V-0) • **Color:** Housing: White; Actuator: Black • **Contact:** Copper Alloy

Mechanical and Electrical Performance:
• **Durability (Actuator Operation):** 10 cycle maximum • **Temperature Range:** -25°C ~ 85°C • **Insulation Resistance:** 50MΩ minimum • **Withstanding Voltage:** AC 200V • **Current Rating:** AC/DC 0.2A

SMT/ZIF Type

The Gas-Tight, High Pressure (GTH) contact system ensures a low cost connection with reliability equal to gold plating. The Zero Insertion Force (ZIF) connection allows an increased number of mating cycles with minimal wear. The ZIF pre-holding process provides a stable and reliable mating operation. The slider ensures maximum cable retention with a minimum size. Fork shaped contacts mean stable and low contact resistance. The cable lock option provides cable strain relief as well as full retention of cable.

Specifications: • Contact Resistance: 30mΩ maximum • Insulation Resistance: 100MΩ minimum • Durability (Mating Cycles): 20 Cycles • Temperature Range: -55°C ~ 85°C • Current Rating: 0.5 A AC/DC • Voltage Rating: 50 V AC/DC

62674 Series:

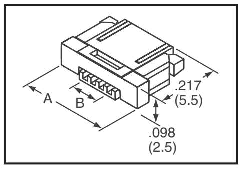
SMT/ZIF Type



The Gas-Tight, High Pressure (GTH) contact system ensures a low cost connection with reliability equal to gold plating. The Zero Insertion Force (ZIF) connection allows an increased number of mating cycles with minimal wear. The ZIF pre-holding process provides a stable and reliable mating operation. The slider ensures maximum cable retention with a minimum size. Fork shaped contacts mean stable and low contact resistance. The cable lock option provides cable strain relief as well as full retention of cable.

Specifications: • Housing Material: Glass Reinforced PPS, UL94V-0 • Contact Material: Phosphor Bronze, Matte pure Tin plated • Contact Resistance: 30MΩ maximum • Insulation Resistance: 500MΩ minimum • Durability (Mating Cycles): 20 Cycles • Temperature Range: -55°C ~ 85°C • Current Rating: 0.5A AC/DC • Voltage Rating: 100V AC/DC

HIROSE ELECTRIC CO.,LTD.

FX10A Series - Surface Mount 0.5mm Conn. with Ground Plate for Board-to-Board Connections

Fig. 1

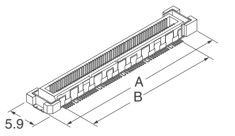

Fig. 2

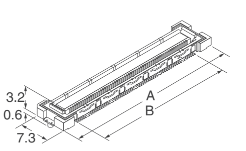

Features: Transmission characteristics have been improved through a design that fixes ground plates to both sides of the header and receptacle.

Signal and ground are arranged in a ratio of 10:1 with the ground plate SMT connected to the board. The ground stability achieved serves to reduce noise. Suited to high-density applications. The single contact pitch of 0.5mm produces a smaller connector utilizing less board area for mounting.

Board-to-Board dimensions of 4mm and 5mm are available.

Materials:

• Insulator: LCP resin, Beige, UL94V–0 • Contacts: Phosphor bronze • Header Engagement Area: Gold plating of 0.1µm • Termination Area: Solder plating • Receptacle Engagement Area: Gold plating of 0.1m • Termination Area: Flash plating Ground plate: Phosphor bronze, solder plating • Reinforced fitting: Phosphor bronze, Tin plating

Electrical:

• Rated current: 0.3A • Operating temperature range: -55 ~ 85°C • Rated voltage: 50VAC • Operating humidity range: Relative humidity 95% or less (No condensation)

Note: The thickness of the solder paste is not included in the stack height.

FX11L Series - Surface Mount 0.5mm Connectors with Ground Plate for 2mm Board-to-Board Connections

Features: Low Profile Design. The board-to-board mating height of 2mm suits smaller, thinner case designs. Improved transmission efficiency between boards. Transmission characteristics have been improved through a design that fixes ground plates to both sides of the header and receptacle. Signal and ground are arranged in a ratio of 10:1 with the ground plate SMT connected to the board. The ground stability achieved serves to reduce noise. Suited to High-Density Applications. The signal contact pitch of 0.5mm produces a smaller connector utilizing less board area for mounting.

Applications: Notebook computers, PDA, and other miniature electronic equipment.

Material: • Insulator: LCP resin, Beige, UL94V-0 • Contacts: Copper alloy • Header: Phosphor bronze • Receptacle: Engagement area: Gold plating of 0.1 µm Termination Area: Flash plating Ground plate: Phosphor bronze solder plating • Reinforced fitting/ plate: Phosphor bronze, Tin plating

Electrical: • Rated current: 0.3 A • Operating temperature range: -55 ~ 80°C • Rated voltage: 50VAC • Operating humidity range: Relative humidity 95% or less (No condensation)

DF1E Series Connectors

2.5 Pitch for Full Lock and Discrete Wire Connection

Features:
- The inner lock system adopts a full lock mechanism. This mechanism prevents disengagement to occur due to an unexpected external shock • The double lock is activated for the use method to give a stress to the cable, to increase crimping contact fixation force, and to prevent the semi-insertion of the crimping contact • Equipped with the mechanism to completely prevent reverse insertion and insertion between dissimilar contacts

Applications:
- Electronic equipment • Office machines • Industrial equipment • Consumer equipment

Specifications:
- UL: E52653 • Current Rating: 20-22AWG: 3A, 24-28AWG: 1A and 30AWG: 0.5A • Voltage Rating: 30VAC • Operating Temperature Range: -35°C ~ 85°C • Operating Moisture Range: 20% ~ 80% • Insulation Resistance: 500VDC, 1000MΩ minimum • Withstanding Voltage: 1 minimum at rated value, 650VAC (no flashover or insulation breakdown) • Contact Resistance: Measured at 20mV maximum and 1mA, 30mΩ maximum

Material:
- Insulator: Polyamide, white, UL94V-0 (header insulator: beige and retainer insulator: black) • Contacts: Crimping: Phosphor copper with tin plating Header: Brass with solder plating

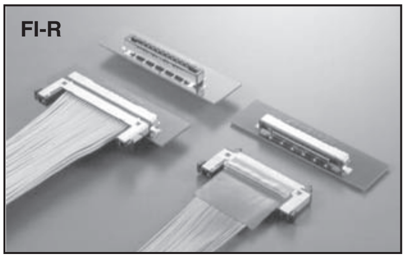
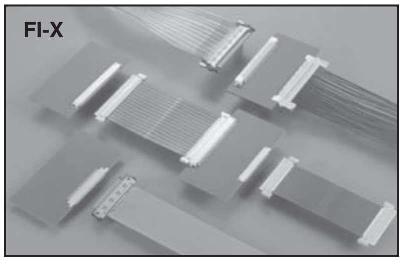
JAE Technology to Inspire Innovation

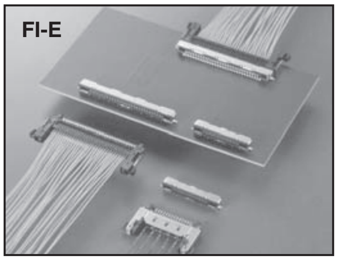
The Leading Edge in LVDS and TMDS Technologies

Low **V**oltage **D**ifferential **S**ignaling (LVDS) — A transmission method for sending digital information. LVDS sends data over data high and data low lines rather than data and ground. The receiver detects the voltage difference between the two signals instead of relative to ground.

Transition **M**inimized **D**ifferential **S**ignaling (TMDS) — A transmission method for sending digital information from a personal computer, set-top box or other video source to a flat panel display. It is used in the VESA Plug and Display, DFP, DVI and HDMI interfaces. TMDS is based on low-voltage differential signaling and converts an 8-bit signal into a 10-bit transition minimized and DC-balanced signal (equal number of 0s and 1s) in order to reduce EMI generation and improve reliability.







Keep up with increasing transmission speeds and progressive LCD technologies with LVDS products from JAE. Designed for high-speed differential transmission, JAE's board-to-cable connector line-up offers industry leading performance and product availability. The low-profile plug/receptacle connector design also offers superior cable retention to ZIF or LIF connectors, and JAE offers one of the industry's only flex cable connectors with a mechanical lock.

EH Series

2.5mm Connectors

Features:

- Compact and Slim: This connector is designed to be compact and unusually thin. It measures only 8.1mm (.319") high after mounting and is just 3.8mm (.150") wide.
- Highly Reliable Contact: The contact has long dimples near the center that ensure continuity of low voltage and low current circuits at all times, even under conditions of vibration and abusive prying.
- Polarizing Guides: The header and housing have guides to prevent improper mating.
- Whisker Prevention: The contact material is treated with a reflow process, and the square post is copper-undercoated and tin/lead-plated for whisker prevention.
- Easy and Effective Crimping: Although the contact is compact, it has a long wire strip length, 2.6 ± 0.4mm (.102" ± .016"). This long length is very useful for automatic crimping and when crimping shielded wires.

Specifications: • Current Rating: 3A AC/DC (22 AWG) • Voltage Rating: 250V AC/DC • Temperature Range: -25°C ~ 85°C • Applicable Wire: 32 ~ 22 AWG

Material and Finish: • Contact: Phosphor bronze, tin-plated • Housing: Nylon 66, UL94V-0, natural (white) • Posts for Headers: Brass, copper-undercoated, tin/lead plated • Wafer: Nylon 66, UL94V-0, natural (white)

Applicable PC Board Thickness: • 0.8 ~ 1.6mm (.031" ~ .063")

BTFW Series Connector System

0.04" (1.00 mm) Floating Board-to-Board

The BTFW Series is a floating board-to-board connector system consisting of plugs and receptacles with two rows of staggered contacts on 0.04" (1.00 mm) center lines. This connector system, is designed for board-to-board applications, such as audio video (AV) and navigation systems in automobiles, that require high density and high reliability interconnects with higher pin counts and surface mount termination. The contacts have a wide floating allowance of ± 0.03" (0.80 mm) in the pitch direction and ± 0.02" (0.50 mm) in the width direction.

Features:

• Wide floating allowance absorbs mating shift between plug and receptacle, permitting self-alignment of the mating connectors; and provides highly reliable mechanical performance • FCI's Gas Tight High Pressure (GTH) contact system provides a highly reliable gas tight (and low cost) connected interface

Materials:

• **Housing:** Glass filled thermoplastic (UL 94 V-0) • Color: Black
• **SMT Plug:** • Contact: Phosphor bronze • Contact Plating: Tin alloy
• **SMT and DIP Receptacle:** • Contact: Brass • Contact Plating: Tin alloy

Electrical and Mechanical Performance:

• Contact resistance: 70mΩ maximum initial • Insulation Resistance: 100MΩ minimum • Current Rating: 1A • Durabillity: 20 Mating Cycles • Operating Temperature Range: -55°C ~ 85°C

MicroCross™ Digital Visual Interface (DVI) Connector System

The MicroCross DVI I/O Connectors from Molex are leading the way in support of the Digital Display Working Group (DDWG) DVI interface standard. MicroCross DVI has been chosen by the DDWG as the standard digital interface for connecting a host device and display device to support high-resolution video applications. Supporting one or two digital channels driven by Transition Minimized Differential Signaling (TMDS) and/or a high bandwidth analog interface, the MicroCross was chosen by the DDWG for its size, performance and cost. No other interface in the industry compares. The innovative crossing ground blade design and Low Force Helix (LFH™) contact interface design provides the industry with a video interface design that will support over 1.65Gb/s per differential pair (for a total 9.9Gb/s over a dual link implementation) and 2.5GHz support for the analog interface. This provides the industry the performance head room it needs for future growth and development of video products. This innovative approach addresses the problem of an industry in transition. By providing a single high performance interface, precious board I/O space is saved and lower system costs are achieved. The interface provides added benefits of a high cycle life interface for mobile applications and the improved EMI performance needed for high speed links. The EMI performance is achieved through the 360° shielding of the MicroCross DVI cable and connector design. The MicroCross DVI connector system and the DVI standard are moving the graphics industry to the next level by providing unmatched electrical and mechanical performance while allowing for low cost implementation.
